

BMD
Biodiversity Meets Data

A Biodiversity Explorer supporting natural resource managers and policymakers

- Tools for biodiversity monitoring, including image, sound, e-DNA, and AI-based taxon identification
- Co-designed Biodiversity Analysis Tools (BATs) for terrestrial, freshwater, and marine ecosystems on local, regional, national and European levels
- A Web-GIS Map Viewer for data exploration

The VREs will empower users to

- Monitor biodiversity
- Identify and analyse drivers of change
- Project climate and land cover impacts on species and habitats

With stakeholders guiding every stage, BMD will bridge data and conservation action for a more sustainable future.

The project will deliver a twofold outcome

Stakeholders will actively contribute from the tools' design to delivery

The project will train stakeholders to use the tools, making sure they fulfil the community's needs and expectations

Get involved!
